SUMMER CAMPS 2011 **WITH NORBERT JANDL**

Norbert has spent all of his life windsurfing and skiing. He has travelled around the world, not only to perfect his own windsurfing skills, but also to learn the ins and outs of how the world's best windsurfing schools teach. He has studied pedagogy, andragogy, and coaching theory at university level.

He was born to be an exceptionally talented instructor, and has over 10 years experience teaching both adults and children. Norbert is a true professional and he has built his own teaching methodology based on his personal working experience, and on RYA and VDWS standards. Since 2004 he has specialised in instructing children, teaching over 100 kids a year to windsurf and ski. He is also a father himself.

Norbert's gift is guiding, motivating and inspiring the kids to love windsurfing. This gives them confidence and a desire to learn more and continue progressing in the sport. The next generation of windsurfers is in very safe hands!
